All,  
Yes, the loading identified on the plans for each structure and clarified in ADDENDUM #02 applies to the COVERED PLAY as well as the IT & TRANSPORTATION Building shell.

**Subject:** RE: 14-201 Addendum #2

Just to be clear this loading applies to BOTH buildings, the open covered building as well as the IT structure. I only ask because the loading for the play structure seems abnormally high, which will increase the cost substantially.

Thanks Luke McInnis
