

# Greenville 2019-2020 Per Pupil Expenditures

Florida's per-pupil expenditures are calculated as the current expenditures divided by unweighted full-time equivalent students using guidelines set forth by the U.S. Department of Education. Current expenditures are comprised of expenditures for the day-to-day operation of schools and local educational agencies (LEAs), including, but not limited to, expenditures for instruction, administration, instructional support, and operation and maintenance of plant. Expenditures are disaggregated by fund source (state and local, or federal) and by type of cost (school-level or district-level).

The [Every Student Succeeds Act \(ESSA\) Per-pupil Expenditures Report](#) contains state, district and school-level expenditure data.

Selected School Year:

## Total Costs Per Pupil

Total costs per pupil are the aggregate of school costs and district indirect costs per pupil.

2019-20 Total Costs Per Pupil (Total School + Total District Indirect Costs)

Total Funds
\$7,842

## School Costs Per Pupil

School costs per pupil are the current costs incurred at the school level directly or indirectly, including costs for instruction, purchased services, materials and supplies, operational capital outlay, student support services, school administration, and operation and maintenance of plant.

2019-20 School Costs Per Pupil

State and Local Funds	Federal Funds	Total Funds
\$4,702	\$2,105	\$6,807

## District Indirect Costs Per Pupil

District indirect costs are costs that are incurred at the district level and allocated to each school, and include student support services, general administration, centralized services and school board.
