

Hamilton County School Safety Advisory Council Meeting

The Hamilton County School District in coordination with the Hamilton County Development Authority held its initial School Safety Advisory Council Meeting on Monday, December 10th. Representatives from the Hamilton County Sheriff's Office, emergency management personnel, and community leaders explored topics such as building strong communication networks between the school and community, promoting first responder mentorship programs, and increasing awareness of potential mental health issues among today's youth. Through this partnership, our goal is to not only build upon a safer and more secure learning environment within our school system but to also positively impact our future workforce and economic growth within Hamilton County.
